***

The attention of all District Registrars and Deputy Inspectors General is invited to the subject and reference cited. During the meeting on 05.07.2013 the following decisions were taken to issue instructions to the field officers.

i) Instances of valuing the trees in the house sites or lands separately have come to the notice. No such method of fixation of separate value for the trees in house sites or lands was prescribed. Hence, the guideline value fixed for the House sites / land only should be adopted by the registering officers, without calculating value separately.

ii) As per the minutes of meeting headed by the Principal Secretary to Government with DRs on 19.06.2013 the matter of adoption of Market Value for the different bits in different Sy.Nos & Ward/ Block/House Nos with separate extents noted in the document, with common boundaries was raised. In such cases, the valuation should be done by adopting the specific guideline value fixed for the particular Sy.No. or ward/Block/ House No to the extent noted against that Survey No. or Ward/Block/House no. if there are no separate extents, the higher value in the different survey numbers or Ward/Block/ House Nos should be adopted.

iii) Value of undivided share of land plus value of structure as per stage of construction should be followed in case of flats under construction. Composite value is applicable only for the completed apartments.

iv) As per the minutes of meeting headed by the Principal Secretary to Government with DRs on 19.06.2013 the matter of fixation of Market Value for the land in a Sub-Sy.No. (not included in Form -IV) but some other Sub-S. No.s of the same sy.no. fixed with specific guideline value in Form -IV was raised. In such cases the highest value of the sub survey no.s or value of the main Survey No. which ever is higher should be adopted.

In case of fixation of Market Value for the land in a Sub-Sy.No. (not included in Form -IV) but some other Sub-No.s of the same Sy.No. fixed with specific guideline value in Form -IV was raised. In such cases the highest value of the sub nos or value of the main Door No. whichever is higher should be adopted.

The above four decisions are given to NIC for taking necessary action to develop software through new logic and ensure the, completion work by CARD Section.

All the District Registrars are requested to issue instructions to the Sub-Registrars working under their control, in this matter and obtain acknowledgement of the receipt of this memo forthwith.

The attention of all the Deputy Inspectors General / District Registrars/ District Registrars (Audit) is invited
to the subject and references cited. Vide reference 11th cited the Government has decided to revise
the
Market Values both in Rural and Urban areas w.e.f.01.04.2013. The broad guidelines for revision of Market
Values are here with enclosed to place the same for perusal of the respective members and

Sd/- Dr. Vijay Kumar,
Commissioner and Inspector General of
Registration and Stamps, A.P., Hyderabad.

**Market Value Revision 2013**

**Broad Guidelines to fix Market Values by Market Value Revision Committees**
The Registration and Stamps Department has simplified the system of fixation of Market Values for
the purpose of levying of the stamp duty, Transfer Duty and Registration Fee in the year 2010 and
broad
guidelines were also issued to the respective committees. To some extent the simplification was achieved
and the following guidelines are issued in furtherance of the simplification process.

1. In the earlier Market Value Revision Guidelines were issued to have only house site rate on
Square
Yard basis instead of acre rate in the GHMC, and Municipalities along with surrounding villages
where
urbanization has spread but the instances came to the notice of this office that still agricultural
values were
proposed for the area falling in urban areas. So instructions were issued to identify the survey
numbers
where agricultural activity is continuing on large scale and then only to propose appropriate
agricultural
value for those Sy. Nos in Form-IV as identified by the District Registrars / Deputy Inspectors
General
concerned in Municipal areas and Corporations.

2. While introducing the Composite Value for apartments for which A.P. Apartment Act, 1987
applies
in the earlier revision instructions were issued to fix 50% to 60% of the Sq. ft. rate quoted by the
builder. In
many cases Composite Values were not proposed and fixed properly and no uniform method was
followed,
so it is instructed to see that in arriving at the Composite Value the construction rate prescribed for
that
area plus Minimum 1/20th of the Square Yard value for that block, WARD and locality be taken in to
consideration and it is also proposed to fix **Minimum** Composite values as follows;

3. Local Body Per Sq.Ft.RS.
   - Nagar Panchayats 1st ,2nd& 3rd Grade Municipalities 800/-
   - Special and Selection Grade Municipalities 1000/-
   - Municipal Corporation 1200/-
   - GHMC 1500/-
Revised structure rates proposed by the respective committee and approved by the C&IG are here with enclosed for proposing and fixing the Composite Values.

(4) Since the effect of Market Value revision w.e.f.01.08.2010 several major panchayts were upgraded as Urban local bodies i.e. Nagar Panchayats, Municipality Grade-III and certain selection grade Municipalities were with upgraded as Municipal Corporations and many villages were included and merged in Municipal limits. So it is instructed to propose the values duly taking the status of local body into consideration and also propose and fix composite values for all the urban local bodies which are newly declared by the Government and also for the villages included in Municipalities and Nagar Panchayats.

(5) In the last revision common values were proposed for the Dry, Wet and Garden classifications but though variation is very meagreDistinct values were proposed in the last revision. It is suggested to propose single value for the above classification wherever there is little variation in the values to adopt common value for all such lands for case of approach and convenience.

(6) It is noticed that in certain villages which are bordering the villages of other SRO / Other Registration Districts though potentiality is similar lesser values were proposed. For example Osman Nagar village falls in R.O., Sangareddy which is nearer to Gopannapalli of Serilingampally SRO values were proposed with huge variation. 

Osman Nagar : Value Per square yard: Rs.1800/- R.O. Sangareddy
Gopannapalli : Value Per square yard: Rs.7000/- S.R.O. Serilingampally.
Likewise Tellapar in R.O., Sangareddy which is nearer to Nallagandla of S.R.O., Serilingampally.

(7) Commissioner and Director of Municipal Administration, A.P. Hyderabad member of (Central Valuation advisory Committee) has suggested that the market value for the lands adjacent village up to 300 Meters and lands adjacent to any type of Road upto 300 Meters should have different market value and similarly the market value of lands upto 500 meters from the boundary of Municipalities and upto 3 KM from boundaries of Municipal corporation would have higher market value than the other similar categories of lands located far away from the Municipalities and Municipal corporation. So this suggestion may also be taken into consideration while proposing the values for the properties fallen in above category.

(8) This time it is decided that the M.V. Revision proposals approved by the respective Committees has to be displayed on the notice board of respective S.R.O. and M.R.O., and also be posted on departmental website for inviting objections/suggestions from the public giving them one month time. The objections and suggestions has to be placed before the committee and the revision committees have to take a decisions on the objections and the Market Values will be revised w.e.f.01.04.2013.

(9) It is also proposed to fix the higher composite values for the ground and first floor of structures
situated in the commercial zone / roads as declared by the Urban Local Authorities and instructions were issued to the DRs and DIsG to identify such commercial properties and to propose higher values. So, appropriate values has to be fixed for the properties located in commercial zones / roads.
